### Surf Side Super Seaweed Cocktail

Available Sizes	Quantity	Savings	MSRP	EOP Cost
2x 2.5-gal Jugs	Any	5%	\$350.00	\$333.00

Surf Side Seaweed Cocktail is a blend of seaweed extracts, plant fertilizers, and Surf Side 37 Wetting Agent designed for high quality sports-turf. Formulated to enhance plant stress tolerance and stimulate microbial activity in the soil, Surf Side Seaweed Cocktail contains both macro- and micronutrients to tone greens and fairways before events, and keep turf healthy during hot summer conditions. The addition of Surf Side 37 enhances the effectiveness of the blend and improves irrigation efficiency.

### Surf Side Jumbo & Super Seaweed Jumbo Pellets

Available Sizes	Quantity	Savings	MSRP	EOP Cost
Case of 2 Jumbo Pellets	Any	5%	\$257.25	\$245.00
Case of 2 Seaweed Jumbo	Any	5%	\$310.00	\$294.50

Surf Side Jumbo Pellets use the same surfactant base as our traditional Pellets, but weigh 9.5 lbs and come in a 1-gallon plastic pail. They are designed for use directly in wet wells to easily apply wetting agents to an entire course. Field tests showed that each Jumbo Pellet treats between 750,000 to 1 million gallons of water.

Super Seaweed Jumbo Pellets are exactly the same as our smaller Seaweed Pellets, just in a larger size. They contain a blend of seaweed extracts to provide turf with a boost of nutrients and stimulate microbial activity in the soil profile to help grass heal and strongly root, especially after sodding.

### Surf Side Granular

Available Sizes	Quantity	Savings	MSRP	EOP Cost
19-gal Fiber Drum (57 lbs)	Any	5%	\$325.00	\$308.75

Surf Side Granular combines the safe and proven performance of Surf Side 37 Wetting Agent with a natural corncob carrier to achieve excellent wettability of sands, clays, and organic matter. Designed to be a spreadable wetting agent, Surf Side Granular can also be mixed with top dressing or divot mix to enhance their effectiveness.
